Technical Release T-0107

TO: ISOLATEK Sales Personnel and Licensed Contractors
FROM: Technical Service Department
DATE: June 6, 2001
SUBJECT: **CAFCO® PRE-COAT**

As a follow-up to our Technical Release T-9508, please be advised that CAFCO PRE-COAT is a specially formulated adhesive product for use with CAFCO 300, 300ES, 300SB, 300N and CAFCO 400 spray-applied fire resistive materials.

The application of PRE-COAT is required prior to the application of the referenced SFRMs on the following surfaces:

**CORRUGATED DECKING
CELLULAR DECKING
CONCRETE SLABS
TRENCH HEADERS.**

PRE-COAT is listed in UL designs D759, G705 and J710.

PRE-COAT shall be applied to cover a minimum of 70% on corrugated decking, cellular decking, concrete slabs and areas beneath trench headers. The applied thickness of PRE-COAT shall be included in the total thickness required of the CAFCO 300, 300ES, 300SB, 300N, 400 SFRM.

Attached is a copy of the SHORT FORM APPLICATION GUIDE for CAFCO PRE-COAT.
